OBJECTIVE

An enthusiastic and motivated Information Technology student with a deep interest in fintech and emerging technologies.Strong in analytical thinking, teamwork, and continuous learning. Dedicated to building innovative solutions that solve real- world problems. Excels in logical reasoning, clear communication, and adaptability. Passionate about exploring new tools and improving technical proficiency. Looking for a dynamic environment to apply skills and grow as a professional

SKILLS

Web Technologies HTML, CSS, Git	Programming Languages Java, Sql, Python, JavaScript
Tools figma, GitHub, Sql Workbench, pgAdmin, Powerbi	Non-Technical Skills Team Collaboration, Logical thinking, Project Planning, Innovative Idea Thinking
Languages Tamil, English	

PROJECTS

- Brain Tumor Detection using Image Processing & ML**
- Built a system to detect brain tumors from MRI scans using Image Processing and Convolutional Neural Networks (CNN).
 - Achieved 94% classification accuracy and automated tumor visualization for early clinical support
- Drowsiness Detection (OpenCV + ML)**
- Developed a driver alertness monitoring system using OpenCV for facial feature tracking (eyes, eyelids, head tilt).
 - Integrated a Machine Learning model to detect drowsiness in real-time, successfully triggering audio/visual alerts with low latency
- Bistro Management System**
- Built a full-stack web application for end-to-end order processing, billing, and inventory management.
 - Streamlined restaurant operations, enabling faster menu updates and generating daily/monthly sales reports
- Road Accident Data Analysis using PowerBI**
- Analyzed 5+ years of real-world accident datasets to identify geographical and temporal trends and patterns.
 - Used PowerBI to create interactive dashboards, suggesting preventive measures for road safety to stakeholders
- Telemedicine Access for Rural Healthcare - SIH 2025**
- Created a mobile application for remote healthcare consultations, targeting rural areas (Nabha, Punjab) for the Smart India Hackathon (SIH) 2025.
 - Included features such as AI-powered symptom checking, medicine availability tracking, and offline access to expand care access

PROFESSIONAL EXPERIENCE

Data Analyst & AI Developer, NoviTech R&D Pvt Ltd Completed internship training in Data Analytics with practical exposure to data processing and visualization techniques. Gained knowledge in analyzing datasets and deriving meaningful insights.	07/2024 – 08/2024
Data Analytics Intern, Nurture Infotech Completed internship training in Data Analytics, where I learned data processing, visualization, and analytical techniques. Gained practical exposure to handling datasets and understanding real-world business insights through data analysis.	06/2025 – 07/2025
Web Development Intern, Appin Technology Completed internship training in Web Development with hands-on experience in creating responsive web pages. Improved skills in frontend development and user interface design.	12/2025 – 01/2026

EDUCATION

B.Tech Information Technology, Nandha Engineering College CGPA:8.6	2023 – 2027 Erode-Tamilnadu
HSC, Vaagai Vidhyalaya Matric Higher Secondary School Percentage: 79%	2022 – 2023 Harur-Dharmapuri

ACHIEVEMENTS & CERTIFICATIONS

2nd Prize in the Technical Quiz Anna University Regional Campus, Coimbatore	Design & Implementation of Human-Computer Interfaces NPTEL (IIT Guwahati)
Privacy and Security in Online Social Media NPTEL (IIT Hyderabad)	Python Programming - Infosys Springboard & Scalar Focused on Object-Oriented Programming and Data Structures
Participated in 24-hour National Hackathon In Nandha Engineering College
